

LyingLogix

Lying and comfort monitoring

A clearer view of herd resting behaviour

LyingLogix uses camera-based analysis to monitor how cows use their resting areas. Review herd lying behaviour and comfort indicators over time.

See how cows use stalls

Monitor stall occupancy and the proportion of cows lying down.

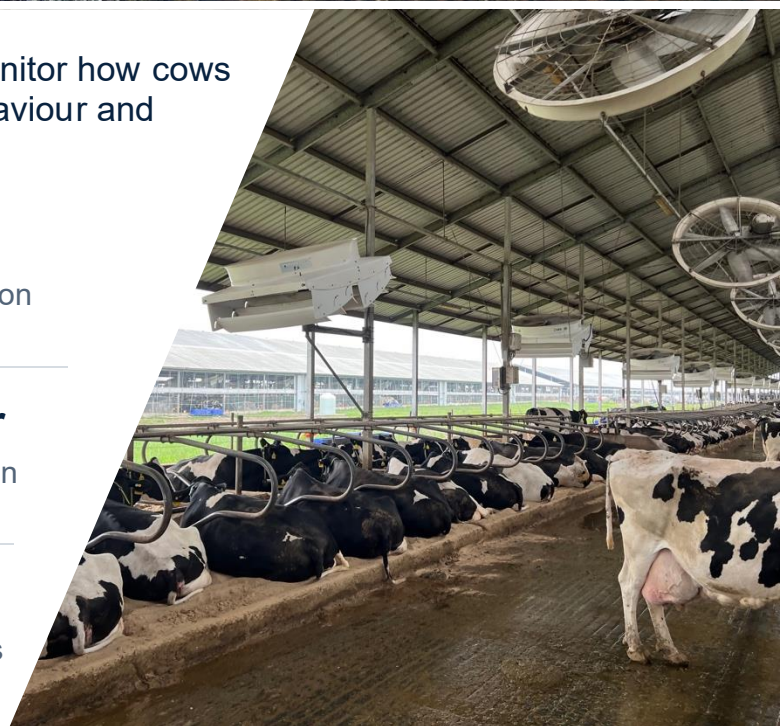

Understand lying behaviour

Track lying time and counts of lying-down and standing-up events.

Review comfort trends

View comfort indicators, historical trends and abnormal behaviour alerts.

HERD ANALYSIS & REPORTS

Review resting patterns over time through historical reports. Results are reported at herd level.
