

NutriTrack

Feeding and feed bunk monitoring

**Know what is happening
along the feed bunk**

NutriTrack uses camera-based analysis to monitor feeding activity and feed availability. See where cows are eating and where feed needs attention.

Monitor feeding activity

See feeding locations, cow counts and feeding time.

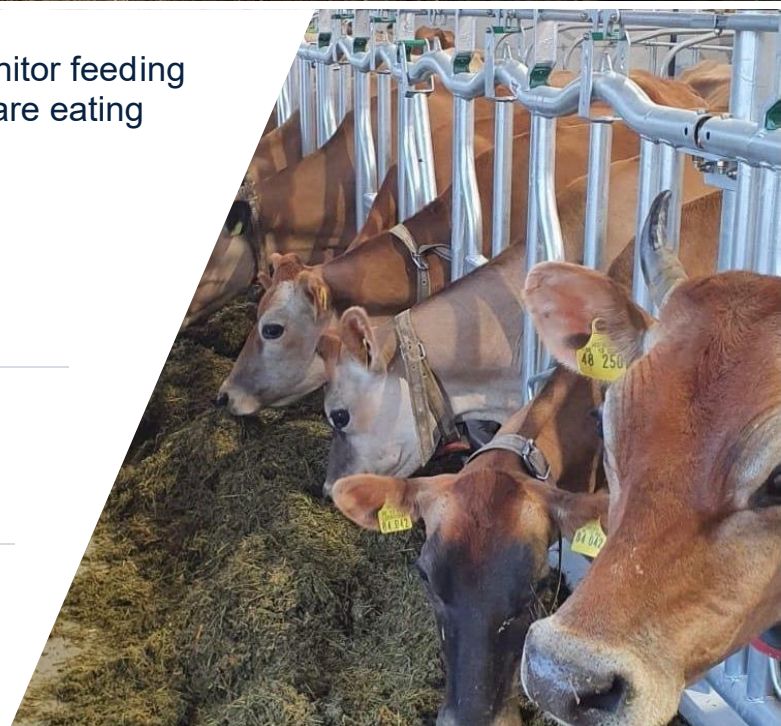

See feed availability

Monitor remaining feed and identify areas with feed gaps.

Act on feed needs

Review calculated prompts to replenish feed or push it back within reach.

FEEDING TRENDS & REPORTS

Review historical feeding and feed availability trends.
Use reports and prompts to support daily feed bunk management.
